Automotive Body Paint Laboratory

Automobiles are meant to be maintained on a periodic basis. This Repair lab trains students under various repairing methodologies.

Features of the Laboratory

This Laboratory Consists of

- ❖ Auto Body Repair, Denting And Painting
- ❖ Repair And Overhauling Of Chassis System (Passenger Cars)
- ❖ Removing the Fender (SOP) Beating out A Dent
- ❖ Paint Stripping
- ❖ Carbon Shrinking

Significance of the Laboratory

- ❖ Auto body repair, despite typically being confined to the aesthetics of a vehicle, represents one of the most important arts involved with the restorations of a vehicle.
- ❖ It can do everything from reversing dents to repairing chipped or scratched paint. The problem is that every bit of damage is unique to the vehicle.
