CNC Programming Laboratory

CNC programming (Computer Numerical Control Programming) is utilized by manufacturers to create program instructions for computers to control a machine tool. CNC is highly involved in the manufacturing process and improves automation as well as flexibility.

Features of the Lab Laboratory

This Lab has equipped with SINUMERIC 808D Turning / Milling, SINUMERIC 840D SL Controllers.

Significance of the Laboratory

CNC Programming Lab Helps Participants to learn:

- ❖ CNC Turning Numerical control programming and Milling Control Programming on Sinumeric 808D controllers.
